Tradermath takes the protection of your data seriously and takes appropriate measures to prevent misuse, loss, unauthorised access, unwanted disclosure and unauthorised modification. If you have the impression that your data is not properly secured or there are indications of abuse, please contact our customer service or via [info@tradermath.org](mailto:info@tradermath.org). Tradermath has taken the following measures to protect your personal data:

- TLS (formerly SSL): We send your data via a secure internet connection. You can see this by the address bar 'https' and the padlock in the address bar.
- DKIM, SPF and DMARC are three internet standards that we use to prevent you from receiving emails on our behalf that contain viruses, are spam or are intended to obtain personal (login) data.
- DNSSEC is an extra security (additional to DNS) for converting a domain name to the associated IP address; it is provided with a digital signature. You can have that signature checked automatically. In this way we prevent you from being redirected to a false IP address.
